

OTB FTTH COVER

The DELTA Fiber Termination Box (OTB) combines the node plate, the base plate with the fiber management unit and the protection cover for the optical node in one enclosure.

The inner construction is designed to enable an easy mounting of optical fibres and optical nodes.

For a more appealing look, the cable routings are hidden, so that the box can be installed in various places.

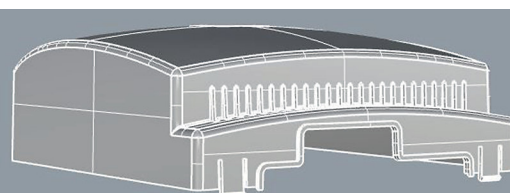

Features

- Optimized protection of fibres and splices
- Excellent ventilation of the installed node
- Modern and appealing design
- Up to three optical connection possibilities
- Customer specific labelling possible
- Dimensions: 220 x 205 x 80 mm
- Article No. 57003247
