O XFP TRANSMITTER CHASSIS AT A GLANCE

Type	Item No.	Description
O XFP Chassis FP	57004248	Chassis, XFP-HF Transmitter, 1RU, 8 XFP-HF ports, front powered
O XFP Chassis BP	57004247	Chassis, XFP-HF Transmitter, 1RU, 8 XFP-HF ports, back powered
O UCH PS-AC	57003586	Power supply, AC 90-264 V
O UCH PS-DC	57003587	Power supply, DC 36-75 V
PC 012 MCX-FM	57003621	Patch cord 1.2 m, MCX male - F male, up to 2.5 GHz, 75 Ohm
PC 030 MCX(M)-F(M)	57004596	Patch cord 3 m, MCX male - F male, up to 2.5 GHz, 75 Ohm
OT XFP 1550 05 PC	57004451	XFP-RF TX-Module, Broadcast 1550nm, 1.2GHz, +5dBm, SBS 17 dBm, LC/PC
OT XFP DWDM PC	57004453	XFP-RF TX-Module, tunable wavelengths (ITU Grid), 1.2GHz, +4 dBm, LC/PC
OA XFP 16GF APC	57004493	XFP-RF EDFA-Module, 16 dBm., LC / APC, Gain Flattening filter integrated
OA XFP 17 APC	57004182	XFP-RF EDFA-Module, 17 dBm, LC / APC
OA XFP 17 PC	57004450	XFP-RF EDFA-Module, 17 dBm, LC / PC
OA XFP 19 APC	57004542	XFP-RF EDFA-Module, 19 dBm, LC / APC
OT XFP DM 1310 09	57004245	XFP-RF TX-Module, direct modulated Broadcast 1310nm, 1.2GHz, +9dBm, LC/APC
OT XFP DM 1310 12	57004246	XFP-RF TX-Module, direct modulated Broadcast 1310nm, 1.2GHz, +12dBm, LC/APC
OT XFP DM 1550 09	57004242	XFP-RF TX-Module, direct modulated Broadcast 1550nm, 1.2GHz, +9 dBm, LC/APC

0 XFP CHASSIS

PRODUCT FEATURES

- High-Density: 8 ports for 8 XFP-RF transmitters in 1 RU chassis
- Individual configuration of OMI, RF amplification, operating mode and SBS status for each of the 10 modules
- Energy efficient: maximally 6 W per module
- User-friendly web browser interface to set up and configure transmitters
- Ethernet SNMP port on the rear panel
- Compatible with SCTE HMS HE (MIB) specifications
- USB-port for firmware update
- Hot-pluggable redundant power supply AC or DC
- Power supply unit needs to be ordered separately
- Field-Replaceable Cooling Fan
- 8 x 75 Ω RF inputs on the rear of the chassis

APPLICATIONS

- 85 MHz to 1218 MHz RF- over fibre applications
- C- and L-Band transport and distribution
- All-Digital QAM networks
- Standard HFC- and RFoG networks
- DOCSIS 3.1 compatible
- Broadcast and Narrowcast services

The DELTA Electronics XFP Chassis is specifically designed around the new XFP transmitter module. The reduction of rack-spacing and power consumption in the headend is more than half in comparison to today's technologies.

Up to 8 XFP modules can be deployed in this 1 rack unit chassis and consume less than 50 W together.

KEY ADVANTAGES

- High Density: 8 transmitters / amplifier per rack-unit
- Power consumption per transmitter less than 6 W
- Redundant powering capability
- User-friendly web browser configuration tool

Via a web server, each XFP server can be individually monitored and controlled. The chassis can be integrated into the IP network via the Ethernet input.

The hot-pluggable power supplies are accessible from either the front or the rear. Redundantly connected, they protect the chassis against power failures.

Type	XFP Chassis	
Item No.		57004248 (Power supplies, front) 57004247 (Power supplies, back)
RF Bandwidth	MHz	85 - 1218
RF Input level	dBµV	60 - 90 (per channel / Composite 87 - 112)
RF Flatness	dB	+/- 1.5
Return loss	dB	> 18
RF Input connection		F-Connector
RF Test point		Available for each Tx module
Dimensions		430 x 290 x 45
Operating temperature range	°C	-10 - +60
Storage temperature range	°C	-40 - 85
Power consumption	°C	50, max. (with 8 XFP modules)
Communications interfaces	W	Ethernet SNMP, RJ-45 on rear panel / USB port on front panel
Indicators	W	LED for each transmitter port (8) Composite power green/red Summary on OLED display

0 XFP TRANSMITTER 1550 nm

PRODUCT FEATURES

- DOCSIS 3.1 compatible with operating bandwidth up to 1218 MHz
- XFP form factor
- Direct modulated
- Transmission of up to 79 analogue plus 75 QAM channels
- Link distance of up to 35 km without optical amplification
- +9 dBm optical output Power
- LC/APC optical connection
- Power consumption < 3.5W
- Built- in digital diagnostic functions
- Compliant with SCTE 195 2013

DELTA Electronics's XFP Transmitter is a pluggable optical module which can be fully loaded with 79 analogue AM-VSB channels plus 75 Digital QAM channels.

The direct modulated XFP transmitter is in a very small package. The small XFP module significantly increases the density and reduces power consumption for downstream transmitter which can be integrated into today's Hybrid-Fibre Coaxial (HFC) optical platforms and tomorrow's broadband infrastructure equipment.

APPLICATIONS

- Hybrid Fibre Coaxial (HFC) cable access networks
- Transmission of broadcast services
- RFoG technology

The OT XFP 1550 09 transmitter modules can complement or replace today's legacy 1310 nm and 1550 nm broadcast transmitters.

Since the wavelength is at 1550 nm, the optical signal can be multiplexed with a legacy 1310 nm optical signal to cost-effectively double the capacity of the fibre to the nodes.

Due to lower fibre loss at 1550 nm, the 9 dBm transmitter can transport signals to a node over fibre up to 35 km regardless of optical dispersion thanks to the modern integrated external modulation technology.

Type	Item No.	Description
OT XFP DM 1550 09	57004242	XFP-RF TX-Module, direct modulated, Broadcast 1550nm, 1.2GHz, +9 dBm, LC/APC

TECHNICAL SPECIFICATIONS

Type		Min.	Typ.	Max.	Ref.
Optical					
OT XFP DM 1550 09	dBm	8.5		9.5	
Optical wavelength range	nm	1550		1558	
SBS suppression					
through 20 km of fibre	dBm			+14	1
through 40 km of fibre	dBm			+11	2

MGC tuning range		-3		+3	

Notes:

1. SBS suppression measured with the following link: transmitter through EDFA, launch power of +14 dBm, 20 km of fibre, 0 dBm input power into receiver
2. SBS suppression measured with the following link: transmitter through EDFA, launch power of +11 dBm, 40 km of fibre, -1 dBm input power into receiver.

0 XFP TRANSMITTER 1310 nm

PRODUCT FEATURES

- DOCSIS 3.1 compatible with operating bandwidth up to 1218 MHz
- XFP form factor
- Direct modulated, no dispersion compensation required
- Transmission of up to 79 analogue plus 75 QAM channels
- Link distance of up to 35 km without optical amplification
- Transmitter version with +9 or +12 dBm Optical Output Power
- LC/APC optical connection
- Power consumption < 3.5W
- Built-in digital diagnostic functions
- Compliant with SCTE 195 2013

DELTA Electronics's XFP Transmitter is a pluggable optical module which can be fully loaded with 79 analogue AM-VSB channels plus 75 Digital QAM channels.

The direct modulated XFP transmitter is in a very small package. The small XFP module significantly increases the density and reduces power consumption for downstream transmitter which can be integrated into today's Hybrid-Fibre Coaxial (HFC) optical platforms and tomorrow's broadband infrastructure equipment.

APPLICATIONS

- Hybrid Fibre Coaxial (HFC) cable access networks
- Transmission of broadcast services
- RFoG technology

The OT XFP 1550 09 transmitter modules can complement or replace today's legacy 1310 nm and 1550 nm broadcast transmitters.

Since the wavelength is at 1550 nm, the optical signal can be multiplexed with a legacy 1310 nm optical signal to cost-effectively double the capacity of the fibre to the nodes.

Due to lower fibre loss at 1550 nm, the 9 dBm transmitter can transport signals to a node over fibre up to 35 km regardless of optical dispersion thanks to the modern integrated external modulation technology.

WAVELENGTH TUNABLE OT XFP DWDM TRANSMITTER

PRODUCT FEATURES

- DOCSIS 3.1 compatible with operating bandwidth up to 1218 MHz
- XFP form factor
- All-Digital 256 QAM loading up to 154 carriers
- Externally modulated, no dispersion compensation required
- SBS up to 20 dBm
- ITU channels adjustable at 100 GHz intervals (on request)
- Link distances up to 60 km
- LC/PC optical connection
- Power consumption < 3.5 W
- Built-in digital diagnostic functions
- Compliant with SCTE 195 2013

The DELTA Electronics XFP Transmitter is a pluggable optical module which can be fully loaded with 154 digital QAM channels. The external modulated XFP transmitter is in a very small package.

The small XFP module significantly increases the density and reduces power consumption for downstream transmitter which can be integrated into today's Hybrid-Fibre Coaxial (HFC) optical platforms and tomorrow's broadband infrastructure equipment.

APPLICATIONS

- Hybrid Fibre Coaxial (HFC) cable access networks
- 1550 nm Broadcast / DWDM Narrowcast overlay architectures
- All-Digital QAM networks

The wavelength of the transmitter can be tuned by the user within 500 ms. For this purpose there are up to 43 (on request) different Dense Wavelength Division Multiplexing wavelengths available within the entire C-band.

This increases operational efficiencies in deploying DWDM networks and reduces inventory of transmitters at different fixed wavelengths.

Wavelength-Tunability also opens the possibility of novel HFC architectures that can dynamically route services and increases bandwidth capacity in the cable operator's access network.

Type	Item No.	Description
OT XFP 1550 05 PC	57004451	XFP-RF TX-Module, Broadcast 1550nm, 1.2GHz, +5dBm, SBS max. 17 dBm, LC/PC
OT XFP DWDM PC	57004453	XFP-RF TX-Module, tunable wavelengths (ITU Grid), 1.2GHz, +4 dBm, LC/PC

O XFP OPTICAL FIBRE AMPLIFIER 1550 nm

PRODUCT FEATURES

- DOCSIS 3.1 compatible
- XFP form factor
- High output power up to 17 dBm
- APC (automatic power control) and FLS (forced laser shutdown)
- LVTTL alarm
- Low power consumption
- Compatible with SCTE 195 2013

APPLICATIONS

- Compatible with DELTA Electronics XFP chassis
- Optimized for using in connection with OT XFP DWDM
- Broadcast and narrowcast application
- Narrowband amplification in C-band
- Amplification of DWDM-wavelengths in DWDM-networks due to integrated equalizer

The small, pluggable OA XFP DWDM is a full-functioning EDFA module with control circuitry packaged inside. It is totally compatible with the O XFP Chassis in respect of size and pin-map. Due to the small size and easy installation, the OA XFP DWDM is designed for single wavelength applications in fibre optic communication systems in core networks, access networks or CATV networks.

The OA XFP DWDM provides very stable output power of up to 17dBm and a noise figure of 6dB in C-band over a wide operating temperature range.

Over I²C all of the alarm-parameters such as output alarm, bias current, temperature and power supply can be analysed.

Type	Item No.	Description
OA XFP 16 AGC GF	57004493	XFP EDFA module, 16dBm optical output power, LC / APC, Gain Flattening filter integrated
OA XFP 17 APC	57004182	XFP EDFA module, 17dBm optical output power, LC/APC
OA XFP 17 PC	57004450	XFP EDFA module, 17dBm optical output power, LC/PC
OA XFP 19 APC	57004542	XFP EDFA module, 19dBm optical output power, LC / APC

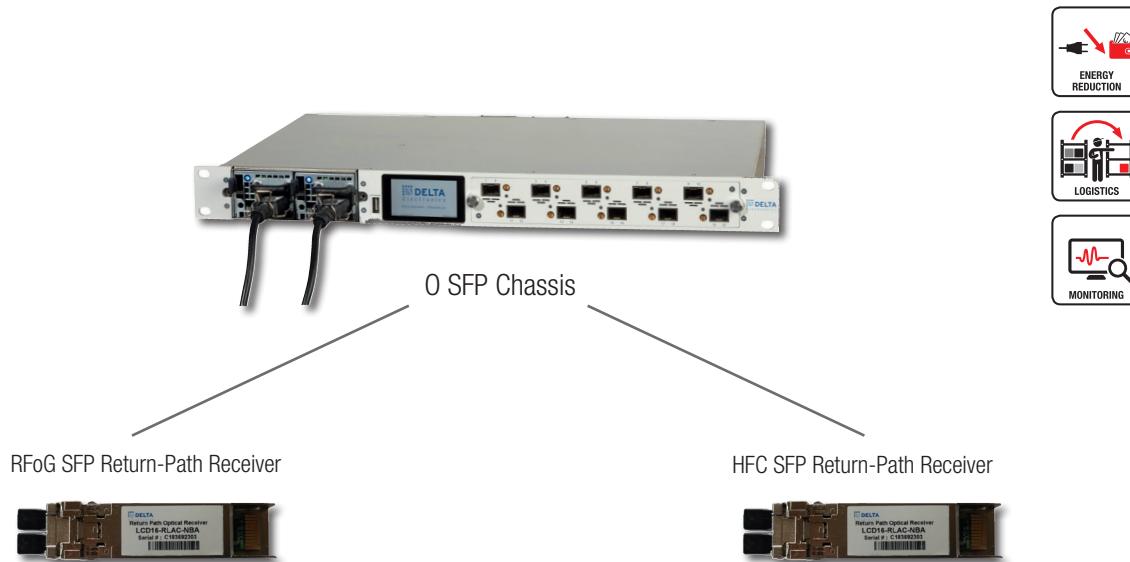

TECHNICAL SPECIFICATIONS

Type	Min.	Typ.	Max.	Ref.
OA XFP 17 optical output power	dBm	16.5	17.5	1
Tuning range	dBm	13.6	17.4	4
Optical output power adjustment range	dB	-5	10	2 / 3
Multi wavelength gain flatness	dB		+9	
Noise figure	dB	5	5.5	6
Optical isolation	dB	30		5
Return loss	dB	40		6
Optical interface 57004182		LC/APC		
Optical interface 57004450		LC/PC		

Notes:

1. Minimum optical input of 0 dBm at wavelength of 1555 nm. Operating at maximum output power.
2. Minimum optical input of -5 dBm at wavelength from 1528.77 nm to 1563.45 nm.
3. Optical amplifier is controlled using constant output power mode which maintains fixed output power regardless of optical input power.
4. Optical output power is adjustable.
5. Peak-to-peak for multiple wavelength signals from 1554.5 nm to 1561.0 nm. For OA XFP 17, optical input at + 9.0 dBm and optical output at + 17.0 dBm.
6. Test Conditions: Optical input power of + 6.0 dBm, optical wavelength =1555 nm, room temperature.

O SFP RECEIVER CHASSIS AT A GLANCE

Type	Item No.	Description
O SFP Chassis	57003439	SFP Chassis
O SFP Chassis / FP	57003764	SFP Chassis front powered
OR SFP H	57003440	HFC SFP Return-Path Receiver
OR SFP L	57003441	RFoG SFP Return-Path Receiver
O UCH PS-AC	57003586	Power supply for O SFP-Chassis AC
O UCH PS-DC	57003587	Power supply for O SFP-Chassis DC
PC 012 MCX-FM	57003621	Patch cord 1.2 m, MCX male - F male, up to 2.5 GHz, 75 Ohm
PC 030 MCX(M)-F(M)	57004596	Patch cord 3 m, MCX male - F male, up to 2.5 GHz, 75 Ohm
O SFP PR	57003971	Pull relief MCX connector

0 SFP CHASSIS

PRODUCT FEATURES

- High-Density: up to 10 SFP modules (20 Rx) in 1 RU chassis
- Energy Efficient: less than 1.5 W per return-path receiver module
- Hot-pluggable redundant power supply AC/DC
- Ethernet SNMP port on the rear panel
- USB-port for firmware update
- User-friendly GUI to monitor and configure the plugged-in modules
- Field-Replaceable Cooling Fan
- 20x75 Ω MCX RF outputs on the rear panel
- Power supply, MCX-F Adapter and Pull relief MCX connector need to be ordered separately

APPLICATIONS

- DOCSIS 3.1 compatible
- Headend / Street cabinet equipment
- Full DOCSIS upstream range coverage 5 to 204 MHz

Key Advantages

- DOCSIS 3.1
- Power consumption per receiver module less than 1.5 W
- HFC / RFoG networks compatible

The DELTA Electronics SFP Chassis enables the operator to pack 20 Return-Path Receivers in one 1RU chassis. The Chassis can be installed into the 19" Rack or in a telecom street cabinet.

10 SFP modules can be inserted into the chassis simultaneously that support RFoG / HFC network.

The embedded web server allows monitoring and controlling each SFP receiver. The chassis can be connected to the internal network using the Ethernet port.

The redundant power supply in the chassis makes a smooth power switching in case of a power outage.

The power supply can be provided in AC/AC, AC/DC, and DC/DC options. This gives a complete power redundancy solution in Headends or Hubs.

RFoG / HFC SFP RETURN - PATH RECEIVER

PRODUCT FEATURES

- DOCSIS 3.1 upstream compatible with operating bandwidth up to 204 MHz
- SFP module with two optical return-path receiver
- Automatic (AGC) and manual (MGC) RF level control
- 1260 nm to 1620 nm wavelength range
- LC / APC
- Power consumption < 1.5 W / module

The SFP has a very low power consumption, achieves a very high return path receiver density and it is compatible to DOCSIS 3.1 upstream.

The low power range SFP module is used for RFoG applications and the high power range SFP module is used for HFC applications.

Type	RFoG / OR SFP L	HFC / OR SFP H

PLATFORM FOR DOCSIS 3.1

FEATURES

- „Pay as you grow“
- 1 Platform and multiple slide-in cassettes
- SFP Receiver Rx
- SFP Digital Receiver RxD
- XFP Transmitter Tx

GATEWAY FTTx

OHR - Optical Hybrid Repeater

FEATURES

- OBI-free for 16 US receivers
- Pluggable MDR with up to 32 ports
- Upgrade to full optical
- Optional integrated patch panel

MDR O-MISO

FEATURES

- Highest density in 1 RU
- Best performance in DOCSIS 3.1

FTTC / ONC

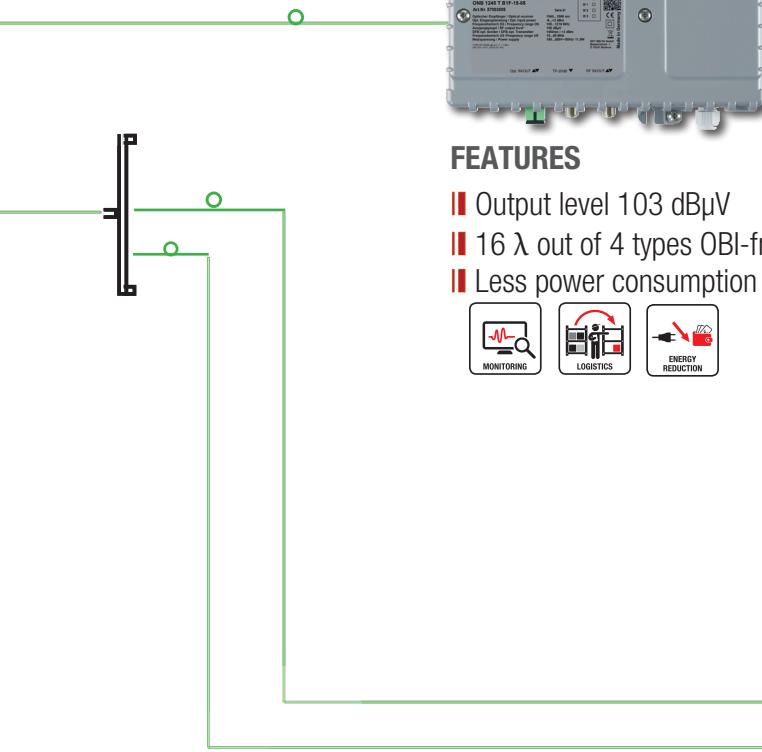

FEATURES

- Output level 107 dB μ V
- N + O architecture

OPTICAL NODES

ONB-T

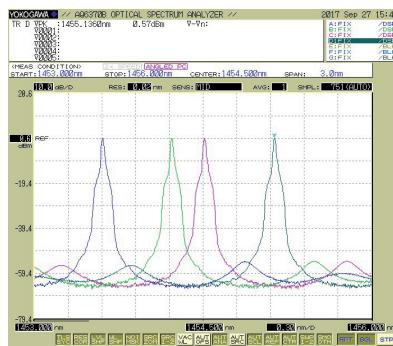

FEATURES

- Output level 103 dB μ V
- 16 λ out of 4 types OBI-free
- Less power consumption

1 λ - 4 subchannels

FTTB / ONB

FTTH / ONH

OFT-DT

OFT-D

FEATURES

- RF Output level 103 dB μ V
- HFC or RFoG networks

FEATURES

- Selectable output
78 / 93 / 97,5 dB μ V

FEATURES

- Self-installation
- Various technologies (D,G,S)
- Output level 65/75 dB μ V

ERBIUM DOPED FIBRE AMPLIFIER - EDFA

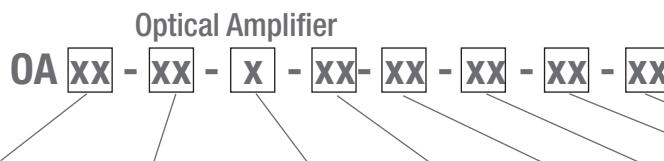

APPLICATIONS

- Optical amplification for the wavelength of 1550nm
- Realization of vast HFC- and RFoG-networks
- Decentral signal distribution / amplification in FTTx / xPON-networks
- CATV-overlay in FTtx and xPON-networks

PRODUCT FEATURES

- High optical output power of +18dBm or +21 dBm at each output port (other optical output levels on request)
- Optical attenuator up to 6 dB in 0.1 steps is integrated
- Optical MEMS switch for redundancy is integrated
- Up to 64 possible optical outputs
- Integrated optical isolation of the downstream wavelength of 1550 nm and all other possible wavelengths in upstream for the realization of standard-RFoG, CWDM-RFoG- or GPON-networks
- Low insertion loss in DS&US and high isolation of DS&US (>50dB)
- Low noise figure
- Parameter-Display: input/output optical power, pump-bias, temperature and voltage
- Supports SNMP monitoring and WebGUI
- Redundant power supply
- 19" rack version, 1 RU for up to 8 outputs and 2 RU for 16, 32 and 64 outputs

	21 dB	50 dB	-9 dBm (noise) -29 dBm (noisefree)

PRODUCT OVERVIEW OPTICAL NODES

As a specialist for HFC- and RFoG-networks, DELTA Electronics offers a wide range of optical nodes. They are optimized for the individual applications at different locations. With the smallest optical nodes also a low number of users can be connected to the RFoG-network. Residential districts can be connected to the optical network with bigger nodes such as the ONB or ONC in a redundant concept.

The decision for a certain optical node depends on several factors:

- Level of the maximum RF-loss after the optical node (passive splitters, length of coaxial cable, etc.)
- Number of fibres for down- and upstream
- Applied wavelength in both directions
- Operating mode of the laser (Burst- or Continuous-mode)
- Existing DOCSIS standard and DOCSIS operation in upstream (channel bonding)
- Remote-control with FOSTRA-F (new RFoG Standard): DS ON/OFF, Burst Mode ON/OFF, Ingress Detection Switch 0 / 6 / 45 dB

*CENELEC : CTB,CSO > 60 dB

OPR -OPTICAL PICO RECEIVER

The OPR is designed by DCT DELTA to terminate the CATV-signal in FTTH networks.

The new OPR includes an additional passive filter to separate and forward the xPON signal to an xPON port. The implemented automatic gain control "AGC mode" keeps the RF output level constant for a wide optical input range. A tri-color LED emits red, green and yellow light and show in which range the optical connected power is.

Features

- RF output level of 76 dBuV @OML=4% per channel
- Complete surge suppression circuit, anti-lightning strike and surge shock prevention ability
- Stable and reliable AGC control function
- Tri-color LED shows the range of the optical input power to the mFN-WF Node
- Total power consumption below 2.0W

RFoG MICRO NODE

Micronode for RFoG networks, FTTH/FTTB applications

- Extremely low noise optical receiver
- Constant RF output level at wide optical input power range
- OLC function based on optical input power
- Interstage attenuator and slope
- Optical input power indicator and monitoring LED's
- RF input and output test point
- Ultra low noise DFB- laser with isolator in burst mode operation
- Internal WDM filter US/DS wavelength for RFoG applications
- Upstream available from 1270nm to 1610nm at CWDM grid to avoid OBI
- Remote controllable in US due to FOSTRA-F receiver module

MINI FIBRE NODE

Mini Node for HFC and RFoG networks

FTTH / FTTB- Applications

- One fibre design with integrated CWDM filter *
- Constant output level over a wide range of optical input power
- OLC-function based on optical input power
- ONB T with up to 4 Sub-channels per one CWDM wavelength
- Low-noise CWDM DFB-Laser with Burst and CW-Mode (SCTE compliant)
- Testpoint and monitoring LED for optical input power
- Upstream with diplexer RLK565-1/585-1 selectable
- RF-testpoints for Upstream and Downstream
- Remote controllable in DS & US due to FOSTRA-F receiver module
- Optional remote power
- Available with GPON-Bypass

* Special type 2-Fibre without CWDM on request

see ONB T on the image

MEDIUM FIBRE NODE FOR HFC / FTTx

**A Fibre Node for the modernisation of HFC-networks.
Especially suitable for FFTLA in 1.2 GHz HFC-networks and
reduction of the coaxial cluster.**

- Compact node with modular return way laser 1x1
- High RF output level and dynamic range, 2 outputs
- Low noise impedance receiver
- Low noise DFB- laser in burst or CW mode operation
- Optical level control (OLC) based on optical input power
- 7-Segment display for various monitoring options and easy control
- Optional remote power
- Internal fibre splice management
- Return way transmitter available in CWDM-grid (1270 - 1610nm)
- Remote controllable in DS & US due to FOSTRA-F receiver module

OPTICAL COMPACT HEADEND

Basic unit with 2 pluggable modules

Pluggable modules

Module 1

Module 2

Type	Transmitter Tx module
Description	Optical transmitter, 5 ... 2400MHz

Type	Receiver Rx module
Description	Optical receiver, 5 ... 2400 MHz

Optical Compact Headend

- Compact Optical Headend with 2 pluggable modules
- Bandwidth 5 ... 2400 MHz
- Ready for analogue PAL TV channels, SAT QPSK distribution and QAM channels
- RF Input level attenuator 0-15 dB (indication and setting on LED display, 1 dB steps)
- Monitoring optical output: green LED (output power available)
- Fibre connectors: SC / APC
- RF connectors F female
- LNB Power supply 12.8 V / max. 500 mA
- Compact die-cast housing 225 x 190 x 86 mm
- Operating voltage VAC 200 - 240
- Weight 2 kg

Possible combinations

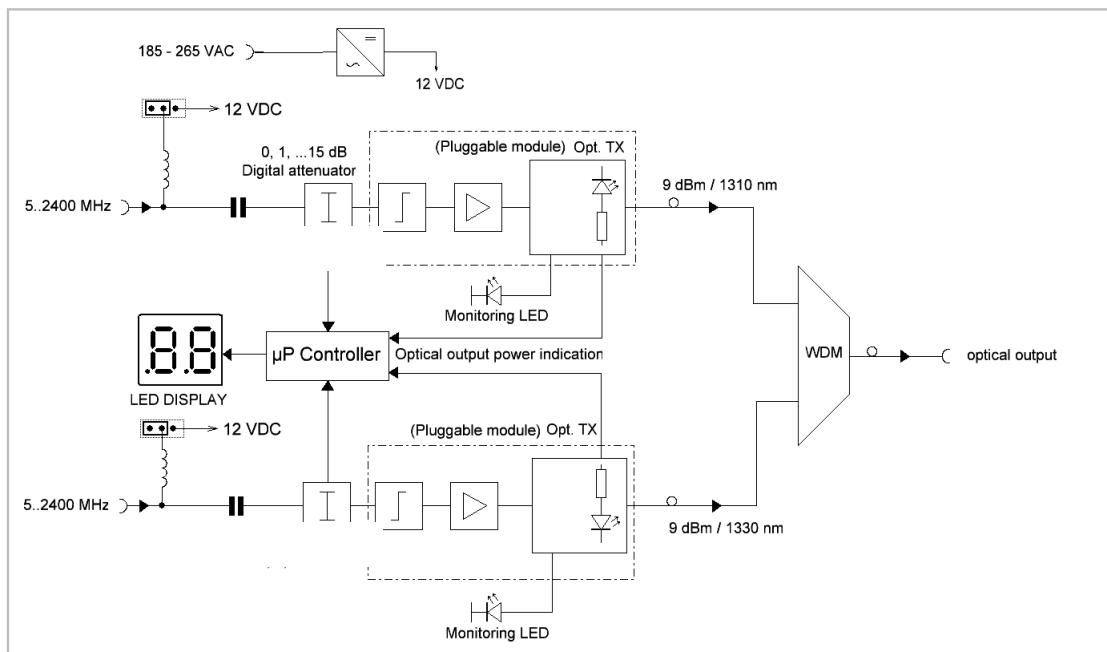

OCH **25** -**XX**-**XX**-**X**

OPTICAL BK / SAT-IF TRANSMITTER

Module 1

- Optical compact transmitter for RF and IF over fibre
- High linearity, DFB Laser with internal optical isolator
- Low distortion wavelengths: 1310, 1330 nm
- 9 dBm optical output power

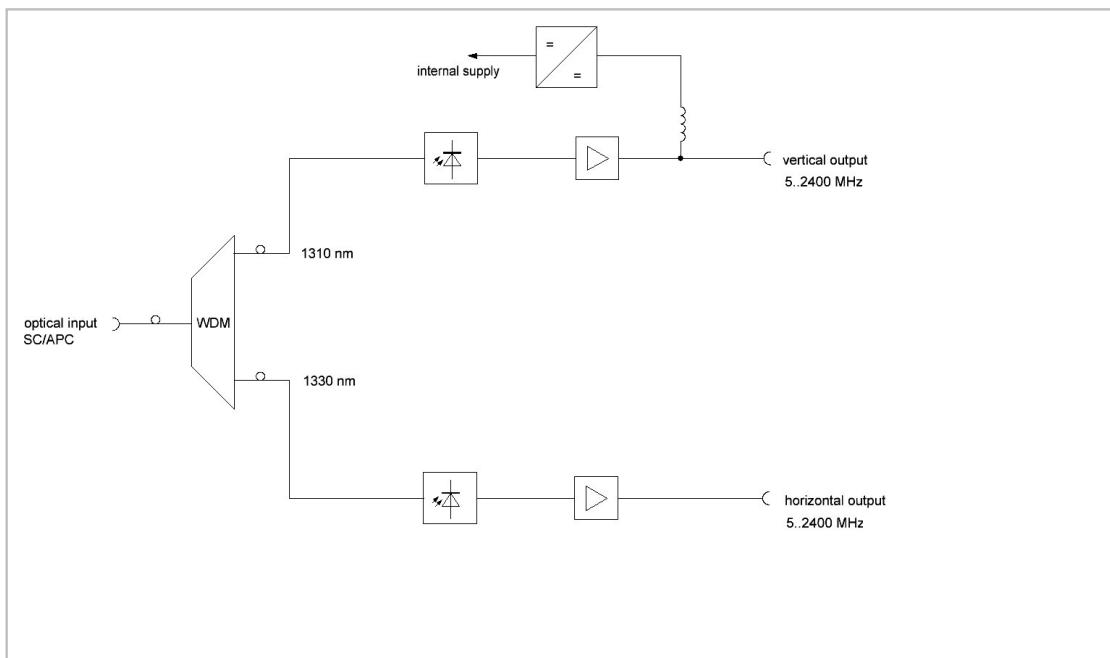

Type	Tx Module	
Applications	CATV and SAT over fibre	
Operation wavelength (λ)	nm	1310, 1330
Optical output power	dBm	+9 (Indication on LED display)
Laser class	1M, DIN EN 60825-1 (2008)	
RF bandwidth	MHz	5 ... 2400
Frequency flatness	dB	± 1.5 (5 – 2400 MHz)
RF input level PAL	$\text{dB}\mu\text{V}$	70...85, ATT = 0...15 dB @ OMI 4%
Maximum input level	$\text{dB}\mu\text{V}$	90
Laser type	un-cooled DFB	
RF return loss	dB	> 14, up to 2200 MHz
Optical return loss	dB	> 55
Optical Link SAT-IF		
Optical budget in combination with OR 25	dB	22
Power consumption	W	7 @ 230 VAC
Operating temperature	°C	-20...+55

OPTICAL BK / SAT-IF RECEIVER

Module 2

- Optical compact receiver for RF and IF over fibre
- Electronic control of RF output level attenuation for each module on the LED display
- Monitoring LEDs

Type	Rx Module
Applications	CATV and SAT over fibre
Operation wavelength (λ) nm	1260 ... 1620
Optical input power dBm	-10 ... 0 (+2 dBm, absolute Max.)
RF bandwidth MHz	5 ... 2400
Frequency flatness dB	± 0.5 (5 – 2400 MHz)
RF output level dB μ V	70 ... 85, OMI 12%
RF return loss dB	> 14, up to 2200 MHz
Optical return loss dB	> 55
Optical input power (digital) dBm	-8.5 ... 0 (Indication on LED display)
Operating temperature °C	-20...+55

OPTICAL REPEATER - MULTIPLE INPUTS SINGLE OUTPUT

O-MISO

O-MISO 4-61-1, 8-61-1, 16-61-1 and 32-61-1 is a DOCSIS 3.1 ready active optical repeater for signal splitting and signal processing for FTTx-Networks.

O-MISO R 4-61-2-6 - OA/LC-FP

Powering	Split factor	US-wavelength	Number of fibres	Output	Gain	Amplifier	Connector	Powering-Position

OPTICAL REPEATER SEGMENTABLE MOVE THE LIGHT - NOT THE CABLE

GENERAL FEATURES

- Multidiode receiver to avoid OBI in US
- Continuous wave noise cancellation functionality (CW-NC) to maximize signal performance for DOCSIS 3.1
- Pay as you growth optimised design
- Max. 2 EDFA to amplify up to 2 DS signals
- Allows easy bandwidth increase by using segmentation
- Enable OFDMA signals in US and DS for new and existing customers
- No need for the complicated Burst mode in fibre nodes
- Manageable via telnet web GUI and SNMP 3
- New compact housing for small street cabinets

O-MISO-S

- Remote US segmentation using up to 4 US wavelengths
- Make your installed nodes OFDMA ready

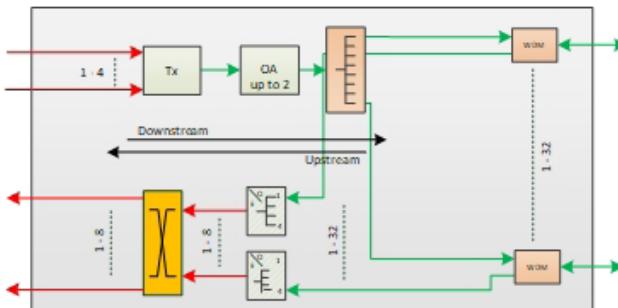

O-MISO-S INVERTED NODE

- Grey optics to realize multiwavelengths architecture in DS
- Handling of up to 4 DS and 8 US signals provided by 4 R-Phy cores
- Optimized for R-Phy based FTTB networks

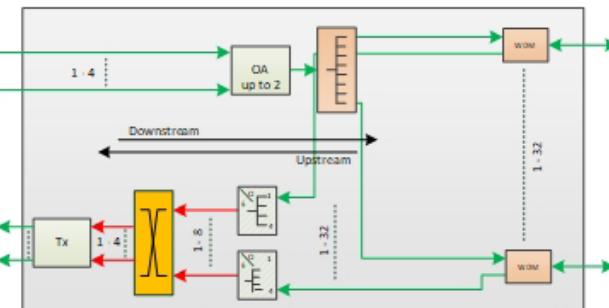

O-MISO-S XX - XX - XX - XXX - XX

Number of ports	Number of transmitter	Number of amplifier (EDFA)	Powering position

THE DELTA HYBRID REPEATER

for future oriented DOCSIS 3.1 networks

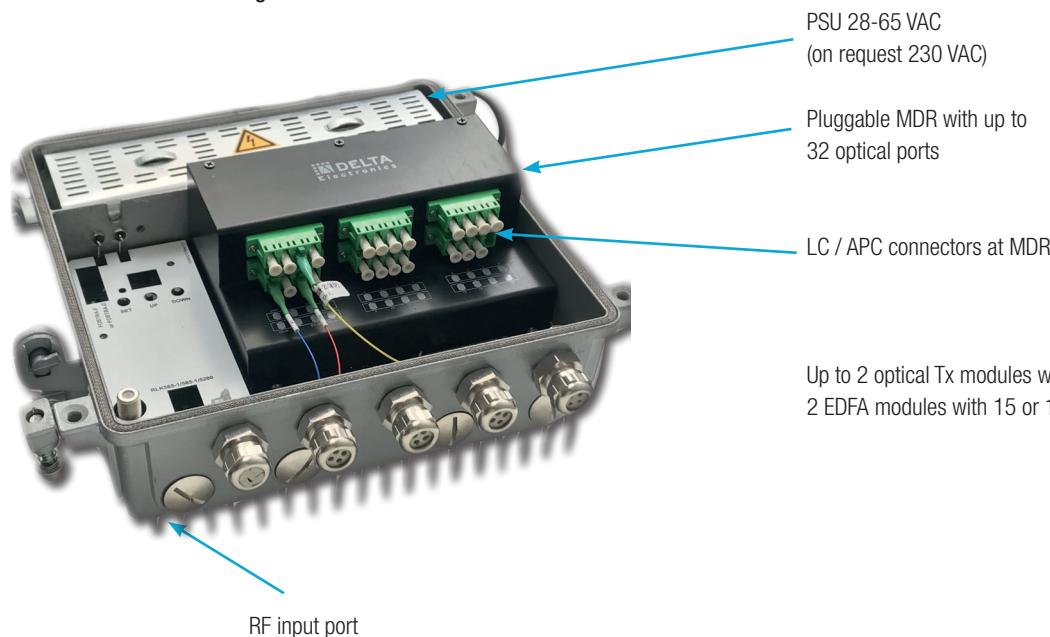

The DELTA Electronics Hybrid Repeater ensures a suitable migration path and cost-effectively connection of customers to fibre optics without overbuilding the coaxial footprint of cable network operators.

The DELTA Hybrid Repeater:

- || Connects optical FTTx networks (Greenfields / Brownfields) to existing coaxial HFC networks cost-effectively
- || Extends range of deployed FTTx networks
- || Provides a suitable migration path towards 100% fibre-optic expansion

Innovative and flexible design reduces installation efforts

The DELTA Hybrid Repeater:

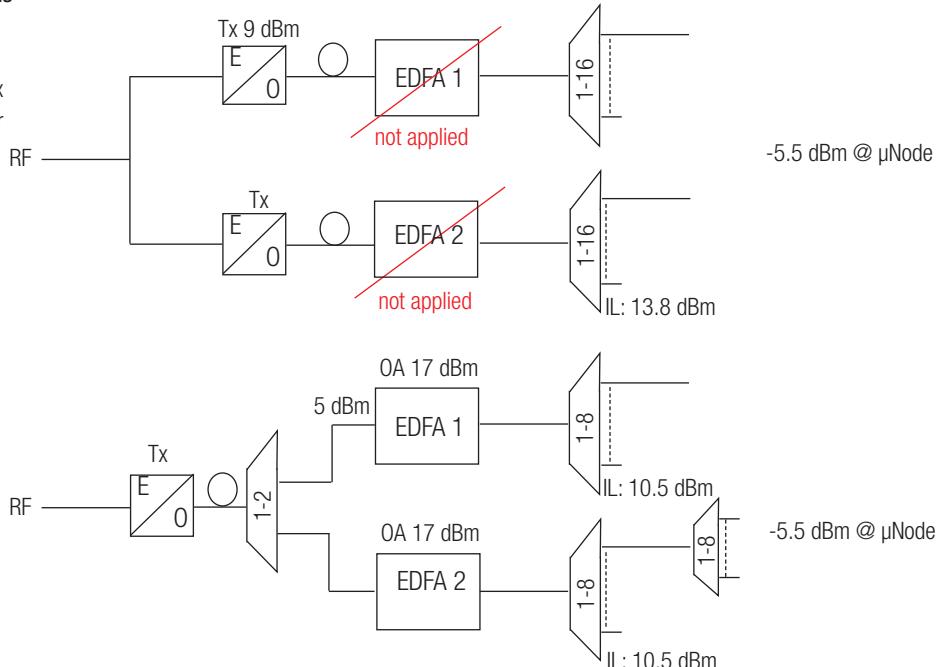

- || Easily exchange of MDR box in case of upgrade or service
- || Reduction of service times and user-friendly

THE DELTA HYBRID REPEATER

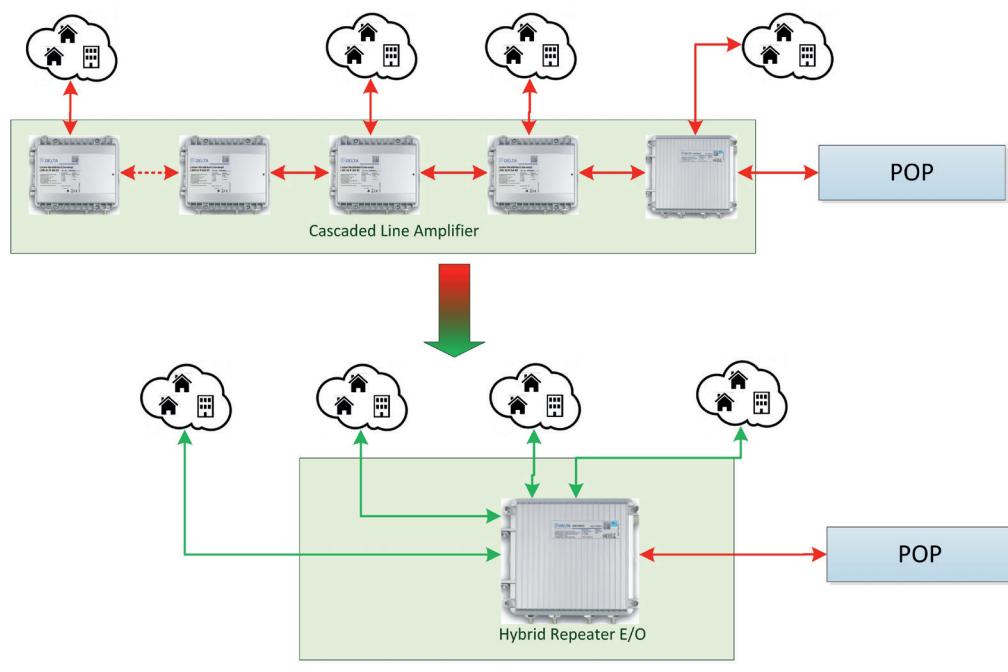

for future oriented DOCSIS 3.1 networks

Various settings fitting various applications

- Pluggable optical DS module with 1 or 2 Tx
- 9 dBm optical output power per transmitter
- Increasing optical DS budget by 3.7 dB
- Up to 32 nodes **without** EDFA module
- Cost-efficient design

Application example: Hybrid Repeater in Brownfield

Legend: — Fiber Optics — Coax

The DELTA Hybrid Repeater:

- Replaces cascaded line amplifiers
- Increases range of PoP through fibre optics
- Reduces number of optical repeater with lower attenuation

THE DELTA HYBRID REPEATER for future oriented DOCSIS 3.1 networks

Compact die-cast housing

- Safety class IP65
- Designed for outdoor applications
- Size 260 x 220 x 122 mm
- Avoids OBI totally
- Increase of CNR

Multi Diode Receiver (MDR)

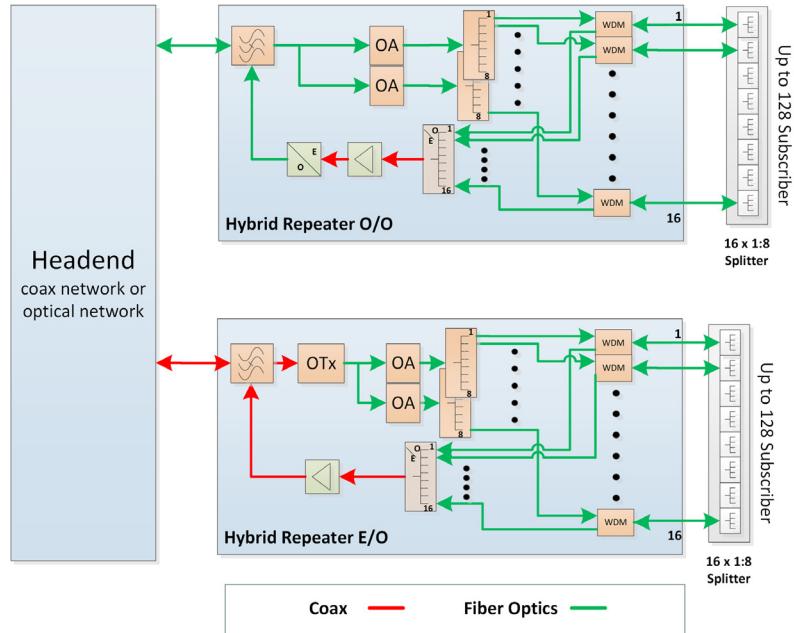

- New design of fibre management box
- Pluggable into IP65 housing
- Up to 32 optical ports
- Size 145 x 100 x 55 mm

General features

- 2,4,8,16 or 32 * optical entry ports
- High gain or standard gain version selectable
- Enables connection of up to 128 nodes / apartments
- Downstream: XFP EDFA module with 15 / 17 dBm optional

Hybrid Repeater (O/O)

- Active optical repeater for signal splitting and processing in optical - optical networks
- Pluggable optical US Tx module

Hybrid Repeater (O/E)

- Active electro-optical repeater for signal splitting and processing in electro - optical networks
- Pluggable optical DS Tx module
- Pluggable RF diplexer
- Upgrade towards Hybrid Repeater (O/O) possible, no new device or technique required

* Based on OHR -8 and 8 x integrated 4-way splitters

FOSTRA and Monitoring with DOCSIS Modem 3.1 optionally

G@Co-LIGHT

G@Co-Light 2.5

- Broadband with conventional available SFP+ modules (e.g. GPON / P2P-Ethernet)
- OLT compatibility through corresponding SFP+ modules
- Per each coaxial cable 2.5 Gbps for up to 31 end users
- At 10 Gbps SFP+ up to 4 x 2.5 Gbps coaxial
- Full data rate up to 43dB attenuation (typ. ~300m)
- Range can be extended by cascading (optical and coaxial cable)
- RF Overlay for CATV
- Outdoor housing for outdoor installations (IP65)
- Reverse power function for installations without power supply in outdoor areas
- Manageable via REST API, TR-069 and VLAN

G@Co-Light, a versatile and cost efficient solution for the last meter on existing coax infrastructure.

The high bandwidths resulting from network upgrades must reach the end customer to meet the increasing demand. Often the broadband expansion stops at the curb of the street or at the house handover point. Necessary modernizations often fail due to the high costs and heterogeneous owner interests.

G@Co-Light follows the MoCA-Standard to overcome these obstacles of the last meters and enable forwarding high data rate to the end user using the existing in-house coax networks.

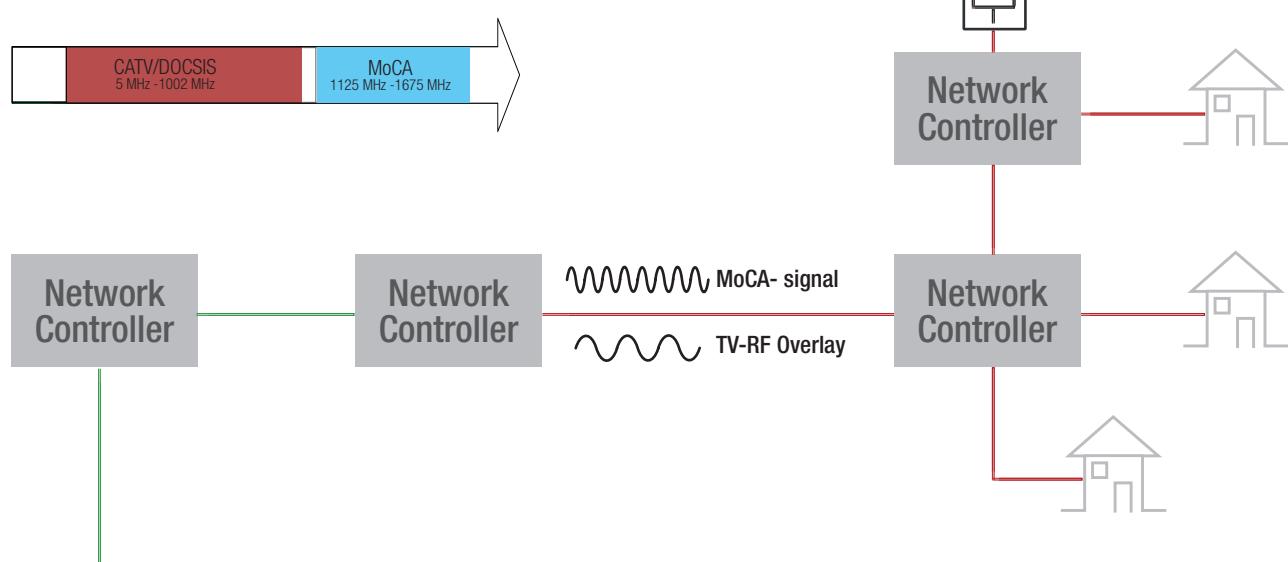

The idea behind G@Co Light is simple, a MoCA Gateway converts the high-speed optical IP signal to an electrical OFDM-modulated QAM signals. The new QAM signal is fed into the existing coax network and provides up to 2.5 Gbps to end users. In other words the MoCA Gateway turns the legacy coax network into a 2.5 Gbps super highway.

The new QAM signals are transmitted at frequencies of 1125MHz – 1675MHz and therefore can be transmitted in parallel to any existing CATV or even DOCSIS 3.1 signal.

At the customer's site, the MoCA QAM signal is terminated by a standard and cost-efficient MoCA end unit.

The following options are available:

- Up to 2.5 Gbps in the upper (MoCA) frequency band
- CATV can be widely retained
- Extendable range for up to 3 Gbps by daisy chain via coaxial cable

OTB FTTH COVER

The DELTA Electronics Fibre Termination Box (OTB) combines the node plate, the base plate with the fibre management unit and the protective cover for the optical node in one enclosure. The inner construction is designed to enable an easy mounting of optical fibres and optical nodes. For a more appealing look, the cable routings are hidden, so that the box can be installed in various places.

3-level design

Features

- Optimized protection of fibres and splices
- Excellent ventilation of the installed node
- Modern and appealing design
- Up to four optical connection possibilities
- Customer specific labelling possible
- Dimensions: 220 x 205 x 80 mm
- Item No. 57003633

OPTICAL ATTENUATOR

Fibre optical attenuator reduces optical signal in fixed attenuation values

- Low insertion loss
- High stability
- Connector type attenuator SC, FC / APC
- Use in optical fibre networks and test equipments

Fibre type		SMF-28e
Operating temperature	°C	-40 ~ +85
Storage temperature	°C	-40 ~ +85
Max. input power	dBm	24.5
Dimensions	mm	482 x 225 x 44 (19" 1RU)

OPTICAL WAVELENGTH DIVISION MULTIPLEXER

Optical wavelength- division multiplexer multiple optical carrier signals on a single optical fibre by using different wavelengths to carry different signals.

- CWDM- channels available
- Low insertion loss
- Wide pass band
- High channel isolation
- High stability and reliability
- Compatible with any FTTX PON technology

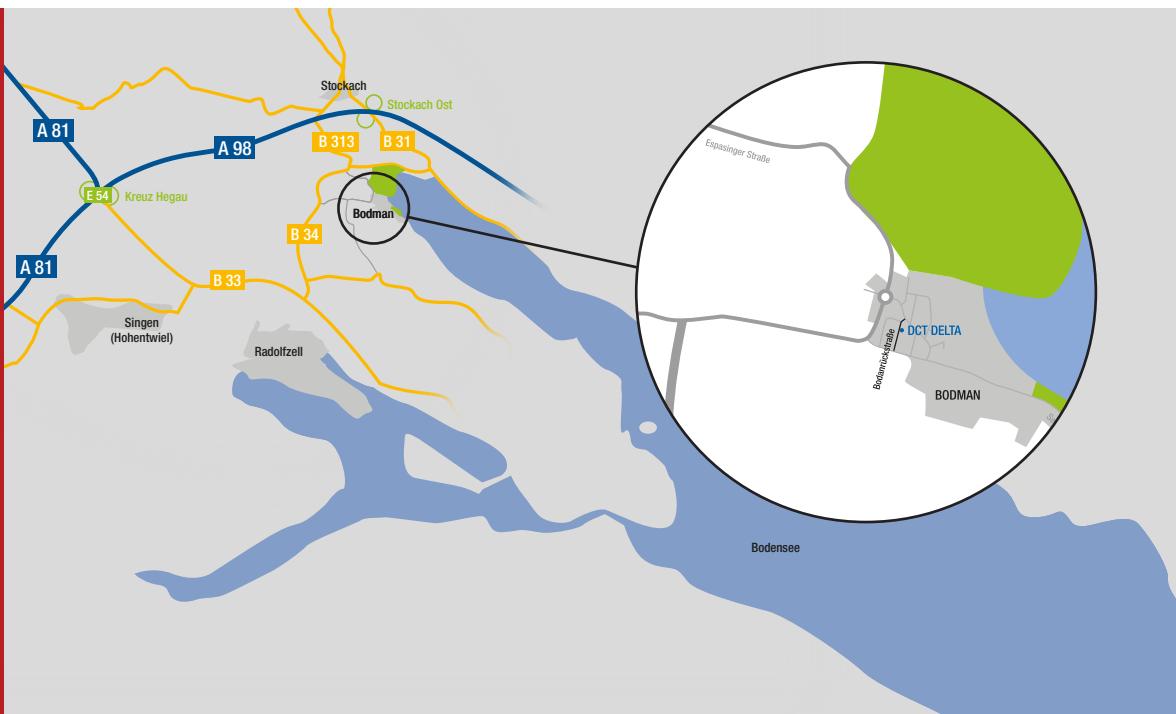

Type	OWDM 1-02 SC-MT	OWDM 1-02 SC RFoG E
Item No.	57002340	57003412
Description	Opt. WDM, 1250-1620 / DS DS: 1540-1560 SC/APC mini tube	Opt. WDM, 1250-1620 / DS DS: 1530-1570 SC/APC mini tube

Type	ODWDM MUX 1-8	ODWDM DEMUX 1-8	ODWDM MUX 1-4	ODWDM DEMUX 1-4
Item No.	57003012	57003013	57003014	57003015
Optical DWDM	DWDM multiplexer	DWDM de-multiplexer	DWDM multiplexer	DWDM de-multiplexer
MUX/DEMUX	8 ITU-channels	8 ITU-channels	4 ITU-channels	4 ITU-channels
C Band: (1528,77 -1563,86)	ITU 21, 22, 24, 26, 28, 33, 36, 39	ITU 21, 22, 24, 26, 28, 33, 36, 39	ITU 44, 48, 52, 54	ITU 44, 48, 52, 54
L Band: (1569,59 - 1604,03)	on request	on request	on request	on request

Type	OWDM 1-xx SC		ODWDM (DE)MUX 1-x
Operation wavelength (λ)	nm	1250 ...1620, CWDM- channels (ITU-T G.694.2)	C-band / L-band
Center wavelength	nm	± 0.5	± 0.03
Channel spacing	nm	20 (CWDM- Network)	ITU ± 0.11
Insertion loss			
1 x 2	dB	< 0.7	< 1.4
1 x 3	dB	< 1.4	-
1 x 4	dB	< 1.5	< 2.0
1 x 8	dB	< 3.0	< 3.0
1 x 16	dB	< 3.8	max. 5.2
Channel ripple	dB	≤ 0.3	≤ 0.5
Isolation	dB	≥ 40	adjacent ≥ 25 ; non-adjacent ≥ 45
Return loss	dB	≥ 45	≥ 50
Max. input power	dBm	24.5	24.5
Operating temperature	°C	0 ~ +70	0 ~ +70
Storage temperature	°C	-40 ~ +85	-40 ~ +85
Dimensions	mm	482 x 225 x 44 or Mini Tube	120 x 80 x 12 or 1 RU
